EXPERTISE

- AI product strategy
- Product-led growth
- GTM partnerships & BD
- Enterprise SaaS
- Team building & transformation

BEYOND WORK

-  AI coding projects
-  Product & startup consulting
-  Wingfoiling
-  Arts

LANGUAGES

French
Arabic
Spanish

SUMMARY

I'm a product leader with 15+ years of experience building software that professional engineers trust to do their most demanding work. As Global Head of Product for AutoCAD, I evolved AutoCAD from a legacy desktop application into a cloud-native AI platform, doubling MAU to 2M+ and driving \$2B+ in revenue. I do my best work at the center of complex transformations, building partnerships and aligning stakeholders on a common vision. I'm known for building high-trust teams empowered to make amazing new things with AI.

EXPERIENCE

Autodesk

2015–2025

Director, Global Head of Product Management, AutoCAD

Owned product, strategy, and growth for the AutoCAD line: 8 toolsets, web, mobile, and developer ecosystem. Doubled the business to \$2B+ over six years.

- **AI strategy:** defined the AI roadmap and shipped an MCP server plus 8+ automations to 1M+ engineers, designed to be safe and reversible in accuracy-critical work.
- **Launched AutoCAD Web:** brought high-precision CAD to the browser for the first time, scaling it to 80K+ MAU through product-led onboarding.
- **GTM partnerships:** negotiated co-integration deals with Google, Microsoft, Dropbox, and Box, giving customers access to 10B+ files stored outside Autodesk.
- **Docs for Design:** launched the shared platform that unified project collaboration for Autodesk's largest enterprises, aligning six product lines, sales, and executives over two years.
- **SaaS transformation:** led the perpetual-to-subscription shift and re-architected the company-wide entitlement system, enabling new web and mobile business models.
- **Leadership:** grew the team from 3 to 12 PMs and 3 senior managers, built exec-level customer relationships, and owned the executive product narrative at Autodesk University.

Fieldwire Labs

2014

Director of Customer Success

- Built the customer-success function from scratch and shaped the early go-to-market motion, landing 7 enterprise customers.

Onshape

2013

Strategy & Marketing Manager

- Built TAM/SAM models, segmentation, and pricing strategy for cloud CAD.

Turner Construction

2008–2012

Virtual Technologies & Field Engineering

- Led 3D coordination and field teams on \$300M+ projects (~\$2M saved); launched a lidar AR/VR service for owners including Partners Healthcare and Harvard.

EDUCATION

MIT Sloan School of Management

2012–2014

MBA, Entrepreneurship & Innovation

Tufts University

2004–2008

BS, Civil Engineering

Additional: UC Berkeley Product Management Certificate (2017) · Andrew Ng Machine Learning (Coursera)

SPEAKING & THOUGHT LEADERSHIP

- **Autodesk University Annual Keynote (2018–2024):** owned the executive product narrative for 4,000+ viewers.
- **Google I/O 2018:** authored the AutoCAD Web narrative presented on the mainstage.
- **Wharton Future of Cities:** panelist on digital twins, spatial computing, and the future of cities.
- Featured in Architosh, Engineering.com, and ITmedia (Japan) on AI and customer-centric product strategy.
