EXPERTISE

- AI product strategy
- Product-led growth
- GTM partnerships & BD
- Enterprise SaaS
- Team building & transformation

BEYOND WORK

- AI coding projects
- Product & startup consulting
- Wingfoiling
- Arts

LANGUAGES

French

Arabic

Spanish

SUMMARY

I'm a product leader with 15+ years building software that professional engineers trust to do their most demanding work. As Global Head of Product for AutoCAD, I evolved a legacy desktop application into a cloud-native AI platform, doubling MAU to 2M+ and driving \$2B+ in revenue. I do my best work at the center of complex transformations, aligning teams and partners around a shared vision. Now I'm focused on building AI-native products.

EXPERIENCE

Autodesk

2015–2025

Global Head of Product Management, AutoCAD

Owned product, strategy, and growth for the AutoCAD line: 8 toolsets, web, mobile, and developer ecosystem. Doubled the business to \$2B+ over six years.

- **AI strategy:** defined the AI roadmap and shipped an MCP server plus 8+ automations to 1M+ engineers, designed to be safe and reversible in accuracy-critical work.
- **Launched AutoCAD Web:** brought high-precision CAD to the browser for the first time, scaling it to 80K+ MAU through product-led onboarding.
- **GTM partnerships:** negotiated co-integration deals with Google, Microsoft, Dropbox, and Box, giving customers access to 10B+ files stored outside Autodesk.
- **Common Data Platform:** packaged a shared collaboration offering across 6 Autodesk products and shipped it to ~3M enterprise users in March 2026, aligning product, sales, and executive stakeholders.
- **SaaS transformation:** led AutoCAD's perpetual-to-subscription shift, re-architecting the company-wide entitlement system and co-defining the cloud-value standards presented to the SEC, which secured the transition and avoided a 4% revenue penalty.
- **Leadership:** grew the product org from 3 to 12 PMs and 3 senior managers across a 170-engineer organization, stood up Product Ops, and owned the executive keynote at Autodesk University.

Fieldwire Labs

2014

Director of Customer Success

- Built the customer-success function from scratch and shaped the early go-to-market motion, landing 7 enterprise customers.

Onshape

2013

Strategy & Marketing Manager

- Built TAM/SAM models, segmentation, and pricing strategy for cloud CAD.

Turner Construction

2008–2012

Virtual Technologies & Field Engineering

- Led 3D coordination and field teams on \$300M+ projects (~\$2M saved); launched a lidar AR/VR service for building owners.

EDUCATION

MIT Sloan School of Management

2012–2014

MBA, Entrepreneurship & Innovation

Tufts University

2004–2008

BS, Civil Engineering

Additional: UC Berkeley Product Management Certificate (2017) · Andrew Ng Machine Learning (Coursera)

SPEAKING & THOUGHT LEADERSHIP

- **Autodesk University Annual Keynote (2018–2024):** owned the executive product narrative for 4,000+ viewers.
- **Google I/O 2018:** authored the AutoCAD Web narrative presented on the mainstage.
- **Wharton Future of Cities:** panelist on digital twins, spatial computing, and the future of cities.
- Featured in Architosh, Engineering.com, and ITmedia (Japan) on AI and customer-centric product strategy.
